Broadcast

DIGITAL SIGNAGE

Broadcast is our hardware agnostic digital signage solution that allows you to turn any device into an interactive sign.

Promote your Programs

Display your featured and promoted events with customization for different locations or audiences.

Customized Messaging

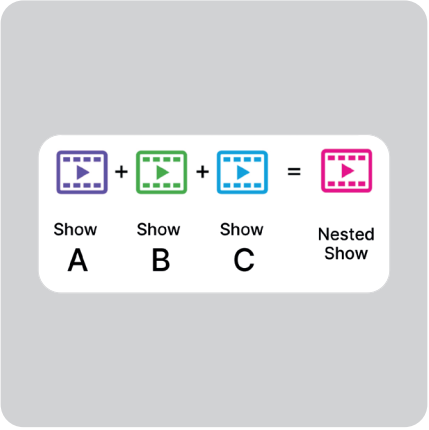
Display welcome messages, opening hours, custom slides and branch-specific information on any screen.

Unlimited Screens

Easily pair and connect as many screens as you need across all your locations.

Your Preferred Devices

No expensive equipment required. Use almost any screen connected to the internet to display your content.



Flexible Shows

Use nested and smart shows for easy repeating and displaying of location-aware content.

Real Time Updates

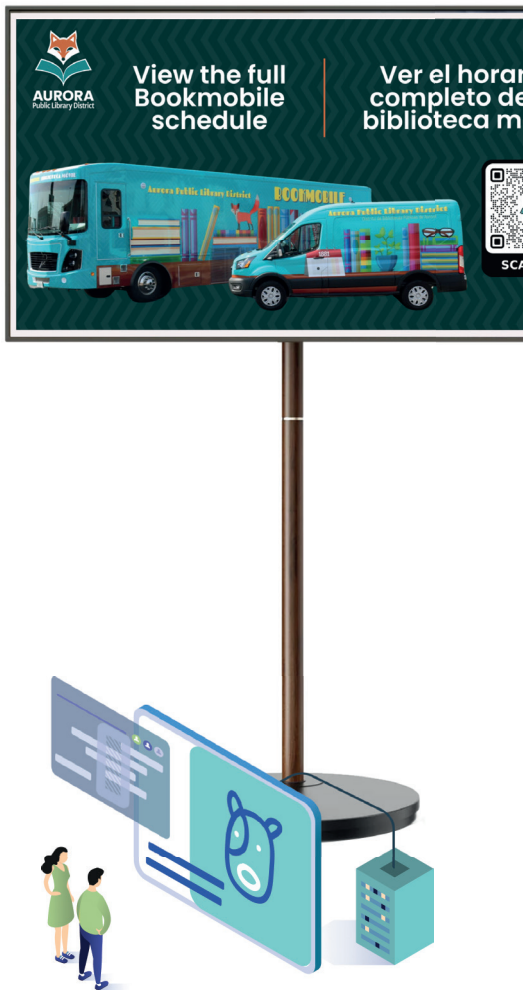
Quickly update your screens to relay important messages in real time on any or all your displays.

Widget Integration

Use customizable upcoming events and room reservation widgets to display what's happening in real time.

Kiosk Displays

Use in tandem with Interact self-service kiosks turning them into a digital sign and amazing marketing opportunity.



Create Channels

Build your custom channels with specifically scheduled shows and play on any number of your screens.

Special Exceptions

Use custom exceptions to override your shows without having to adjust your regular schedule.

Overlay Options

Add an image or text that will automatically be placed over every slide.

Easy Importing

Create slides using popular tools like Canva and PowerPoint and easily import custom content into your shows.

Remote Access

Not in the branch? Easily update the content playing on any of your screens from anywhere.

Creative Content

Create and add static slides, dynamically updating widgets, animations and videos to your shows.

Easy Scheduling

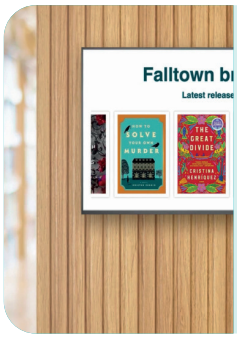
Set start and stop days for your slides ensuring nothing displays before you're ready or longer than you'd like.

Constant Content

If your device loses internet your show will continue to play and updates will appear once the connection is restored.

Empower your customers

- Learn about library services
- View upcoming events
- See library updates in real time



Help staff

- Promote all library services
- Spread important messages quickly
- Control content from wherever you are
