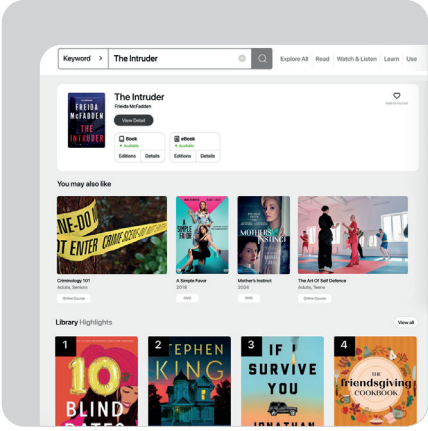
Explore

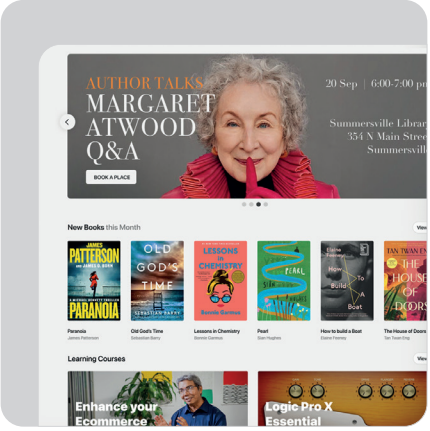
UNIFIED DISCOVERY & AI SEARCH

Explore is a completely reimagined discovery experience that helps libraries connect customers with a full range of resources by seamlessly integrating catalogs, digital content, events, and more into one intuitive, user-friendly search experience.



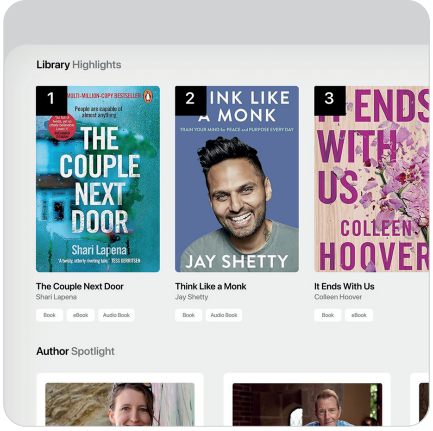
Unified Search

Robust, powerful search that unifies your catalog, eContent, events, and more into a seamless experience.



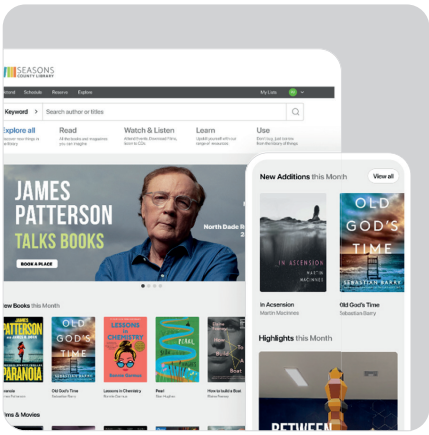
Seamless Integration

Real-time synchronization with your ILS for holdings, customer accounts, and availability.



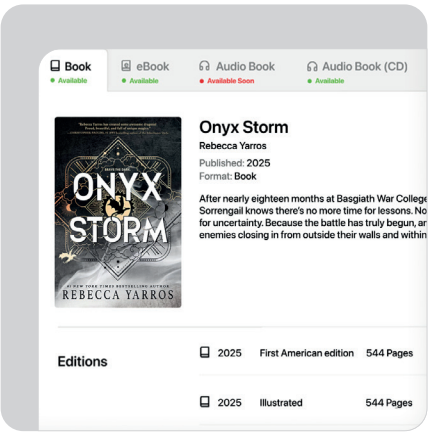
Enhanced Engagement

Personalized recommendations, reading lists, and social sharing tools to drive usage.



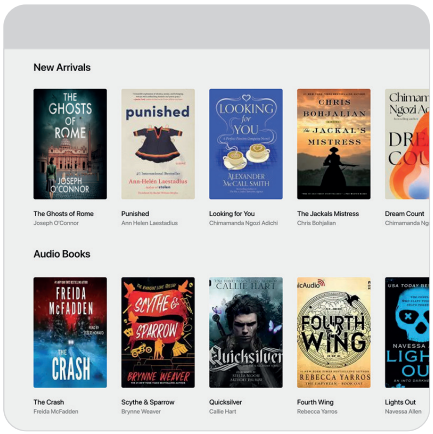
Responsive design

WCAG 2.1 AA compliance, responsive design, and ADA-friendly navigation for web, tablet, and mobile.



Record Grouping

Group all formats of a title together, with the option to manually group or ungroup items as needed.



Reusable Carousels

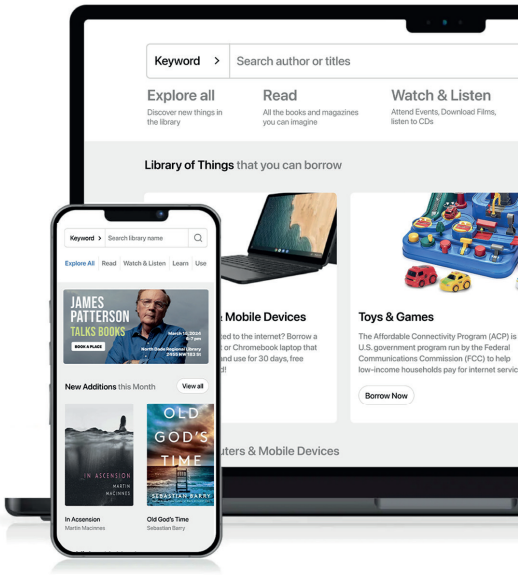
Create dynamic or custom carousels that auto-update across your site, app, or digital signage.

Insightful Analytics

Intuitive customization, usage reports, and promotional banners via your Communico Control Panel.

Single Ecosystem

Fully integrated with Communico, providing customers a seamless, unified place to explore all your library offers.



Third-Party Friendly

Connects directly to providers like Libby, Hoopla. Boundless, PressReader and more.

Custom Branding

Tailor the look and feel to match your brand with full control over colors, layout, and fonts.

Visual Browsing

Supports cover browsing, curated displays, and features picks to mimic the in-branch experience.

Auto Sign-in

Where supported, Explore offers single sign-on for seamless access to all your content.

Promotion Blocks

Link search terms to promotional blocks to appear in results for a given search term.

Book Lists

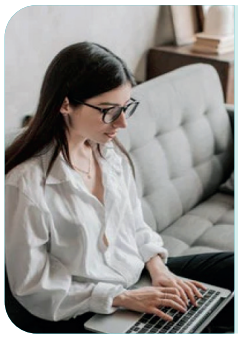
Pull top lists like the NYT Bestsellers and automatically exclude titles not in your catalog.

Google Analytics

Google Analytics metrics and GA4 with custom events via site or page-level JavaScript is supported.

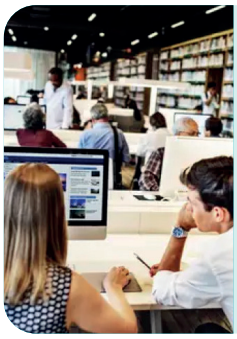
ILS Compatibility

Explore works with Evergreen, Horizon, Koha, Polaris, Sierra, Spydus, Symphony and other leading library systems.



Empower your customers

- Use a single search for everything
- Uncover everything you have to offer
- Receive personalized recommendations



Help staff

- Highlight key resources with ease
- Save time with automated content updates
- Gather insightful data and usage
