

Collections

REUSABLE LISTS

Collections lets staff gather titles, e-content, events and rooms into a list, then show that list on your website, catalog, app, screens and kiosks. The more Communico modules you have, the more places it works.

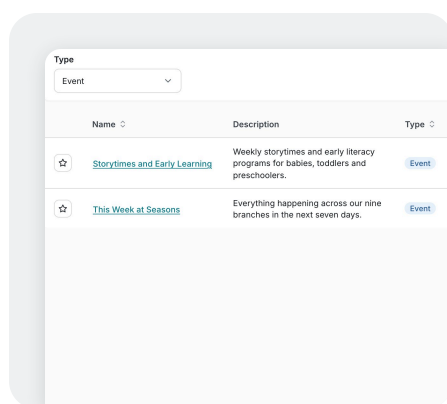

EDIT COLLECTION
Cosy autumn nights

Mix what goes in

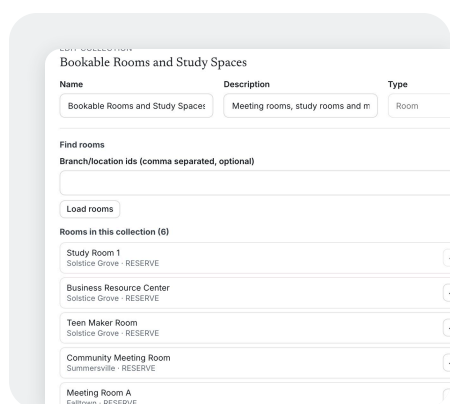

Put catalog titles, e-books, audiobooks, streaming video and online courses in the same list.

Lists that update themselves

Attach a feed such as the New York Times bestsellers or your newest arrivals, and the list stays current without staff touching it.

Events as a collection

Save a search in Attend, such as story times this month, and show the results as a live list.

Voices of Prince George's County

Rooms as a collection

Pick rooms from Reserve and show them as a list customers can browse and book from.

Your order, your choice

Drag items into the order you want. The order you set is the order customers see.

Change once, update everywhere

Edit a collection and every page, screen and app that shows it changes with it.

E-content providers

Works with providers such as Libby, hoopla, Kanopy, PressReader, Creativebug, Freegal and Mango.

New arrivals

A feed from your library system adds new titles as they are cataloged.

Permissions

Decide which staff can create and edit collections.

Website carousels

Drop a collection onto any page of your website as a carousel.

Library app

Show the same collections on the home screen of your library's app.

Ready-made feeds

New York Times bestsellers, independent booksellers and Publishers Weekly lists, ready to attach.

Works with your ILS

Catalog titles come from the library system you already use.

One place to manage

Staff build and edit every collection in the same control panel as the rest of Communico One.

Catalog home page

Feature collections on your catalog home page and beside search results.

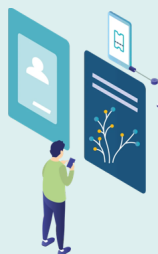

Screens and kiosks

Play a collection on any screen, or put it on your self-service kiosks.

Empower your customers

- ✓ Find staff picks wherever they are
- ✓ See what is new without searching
- ✓ Go from a list to a hold or a booking

Help staff

- ✓ Build a list once, not once per module
- ✓ Let feeds keep lists current
- ✓ Promote the same picks on every channel
