Communico One

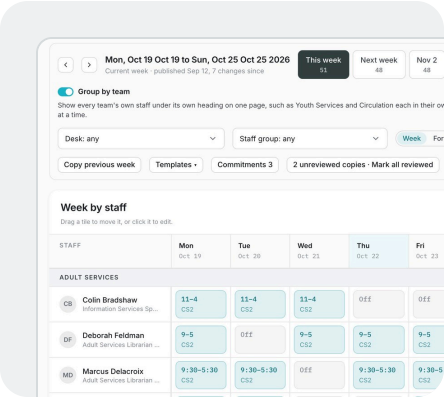

THE PLATFORM FOR LIBRARIES

Communico One gives every library the same foundation: one control panel, one login, one customer record and one set of numbers. Everything else you add builds on it.

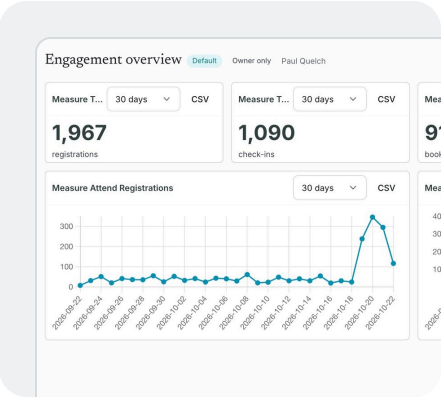

One control panel

Start with Communico One and add systems and modules when you are ready. Each one switches on inside the same control panel.

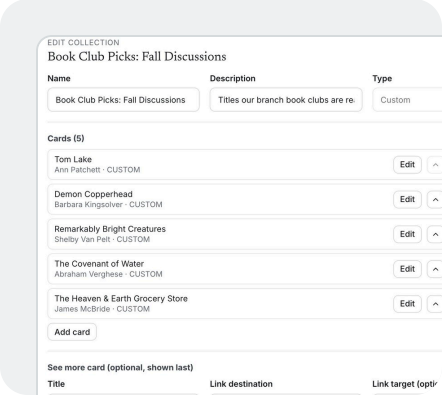

Staff scheduling

Roster plans who works where and when across your libraries. It shows gaps before they happen and flags rule problems before you publish.

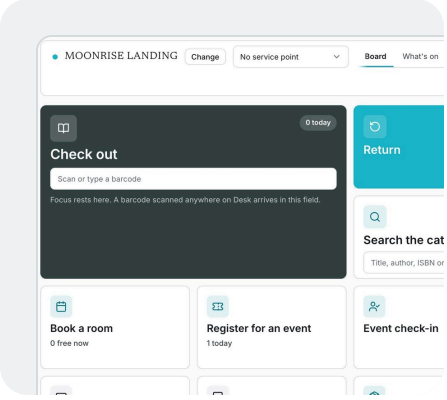

One set of numbers

Measure reports on every module you run, in the same place, with dashboards you build yourself.

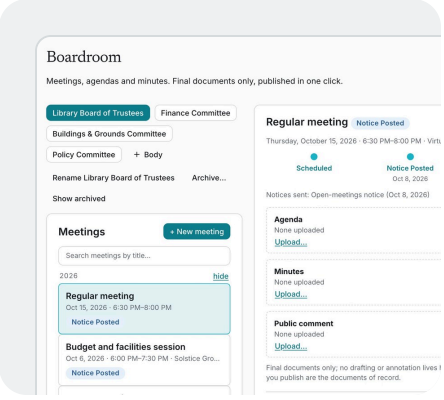

Reusable lists

Collections lets staff gather titles, e-content, events and rooms into a list, then show it on your website, catalog, app and screens.

Front desk tools

Desk gives staff one screen for the person standing in front of them at the information desk.

Board meetings

Boardroom helps your library manage its board's meetings, agendas, minutes and trustees. A public page keeps the community informed.

Drag and drop pages
Build website pages from blocks, start from a designer template and keep your brand across modules.

Page history
Compare earlier versions of a page and go back when you need to.

Your own domain
Use your library's web address, with hosting and security certificates included.

Coverage checking
See open hours against scheduled shifts and spot gaps before they happen.

Custom metrics
Name what you count, such as checkouts, and reuse it across dashboards.

One login
Staff use one account for every module you run.

One customer record
Each module reads and updates the same record for each person.

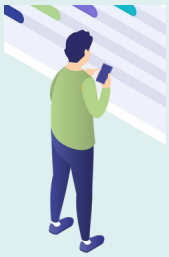

Email and text messages
Notify sends your library's messages and keeps a copy in each person's account.

Customer preferences
Customers choose their channels and Notify checks before every send.

Library system links
Exchange connects Evergreen, Horizon, Koha, Polaris, Sierra, Spydus, Symphony and other leading library systems.

Empower your customers
- One look across every module
- Messages that respect each choice
- Easy to find your library online

Help staff
- One login for every module
- Show only what each role allows
- Add the modules you need
