transfer books to your eReader

- On the CloudLibrary website go to **My Books > Current**. Click on the desired eBook title to open the Book Details page. Click **Download for offline reading**. The file will download to your computer's designated download folder (often Downloads).
- In Adobe Digital Editions, click on **File** from the upper menu and choose **Add to Library**.
- Navigate to the folder with your downloaded file and find the book file. *If you don't see the file, you may have to choose Adobe Content Server Message (.acsm) as the file type.*
- Select the file and click **Open**. The book will now open in Adobe Digital Editions. *If you are experiencing issues with your titles being grayed out in ADE, navigate to your computer's designated download folder and double-click. They should automatically open in ADE.*
- To transfer an eBook to your eReader, connect the eReader to your computer and turn it on; if prompted, click to allow the computer access to your device. The reader should appear in the upper right corner of Digital Editions. Drag and drop the book from your bookshelf to the device (watch for the green plus). Be sure to eject your eReader from your computer before disconnecting the cable.
