Accessibility

The accessibility feature makes it easier for visually-impaired users to use the station by utilizing the following features:

Magnifier—Enlarges part of the screen so the user can see words and images better.

Narrator—A screen narrator reads aloud the text that appears on screen along with any audio descriptions.

High Contrast—Utilizes a high contrast scheme for easier visibility.

Output Locations

File Formats

ABBYY® Fine Reader - OCR supports 192 recognition languages in all combinations.

Translation Service – Translate a scan to one of up to 100 supported languages. The converted scan is sent as a PDF or Word File and a subset of languages for MP3 audio file conversion to any of the destinations above. System-wide annual cost.

Scan to Fax – Faxes are transmitted via the internet; no phone lines are required. Smart fax transmit.

True Copy Function – Provides user with an easy way to utilize the ScanEZ Station as a copier replacement including reduction and enlargement capabilities.

Editing Capabilities

- Resolution** – Change the resolution of a scan from standard resolution to high-quality resolution, or from high-quality resolution to standard resolution
- Color Mode** – Scan items in Black & White, Grayscale or Photo Color
- Page Arrange** – Easily reorder pages by dragging and dropping the pages into the desired order
- Fit to Page** – Resize the scanned item to fit on a standard letter-size page
- Actual Size** – Maintain the aspects of the originally scanned item
- Horizontal or Vertical Split** - Pages can be split either horizontally or vertically by positioning the division bar at the dividing point
- Simplified Reduction Elargement**

Image Enhancement

Patented Technology

The ScanEZ station applies patented image science to enhance photos, documents, newspaper articles, digital photographs and more. 1-click technology improves your images, restoring and reviving your memories and history.

Old Photos, Newspapers, Documents and Books

- AI (Artificial Intelligence) analyzes every image
- Adjusts color, contrast, lightness and sharpness
- Nine color-corrected images are presented to pick which image looks the best to the user
- The original and restored images are presented side-by-side to review
- The image can now be fine-tuned with easy-to-use sliders
- Automatically adjusts what Adobe manually corrects (with layers and curves)
- Easy to use...one touch or single button corrections

Newspapers & Documents

Translation Services

Breaking Down the Language Barrier

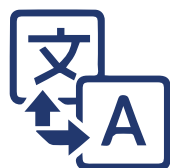

Multilingual Translation Service to Text & Audio - Converts documents scanned in one language to another language of the user's choice with 100 languages to choose from using either Google or Microsoft Azure Cognitive Services. The converted scans are sent as Microsoft Word file and a translation subset for MP3 audio file conversion that can be sent to any of the ScanEZ "scan to" locations. Our catalogue of languages is constantly growing.

Document

Converted Document

Translation Services

Text to Voice Service translates text to an audio file, which can then be listened to. Supports up to 34 languages in Audio.
